Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 December 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Status of Claims

1. Claims 1-8, 10-33, 35-60 and 62-76 have been examined.

Response to Amendments

2. The Applicant argues that the limitations regarding private and public information are not present in the prior art of Walker et al.. The Examiner respectfully disagrees. Initially, the Examiner would like to point out that the term "private electronic environment" is extremely broad and it is the Examiner's responsibility to give claim language its broadest reasonable interpretation. The central controller of Walker et al., therefore, is a private electronic environment, as the public does not have access to its data stores (figure 2). For example, the central controller is protected from public access through the use of access rights and cryptography for identifying and authenticating buyers and sellers (figures 5, 9 and 14-18; column 26, lines 47-53). Hence, the prior art continues to read on the Applicant's claims and the Examiner maintains the rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8, 10-23, 25-33, 35-48, 50-60, 62-74 and 76 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Walker et al., U.S. Patent No. 5,794,207.

As per claims 1-8, 10-23, 25-33, 35-48, 50-60, 62-74 and 76, Walker et al. teach a method for managing information comprising:

- identifying information (e.g. entered data regarding proposal for a contract) to be managed (figure 1)
- managing information within a public environment offline from the private environment (figures 2, 6 and 20; column 12, lines 8-21 and 40-53; column 14, lines 33-39; column/line 22/39-23/19; column 27, lines 20-43)
- obtaining (e.g. pre-fetching) data from the private electronic environment to be used for creating the proposal and wherein the private environment comprises executing a server running an

enterprise resource planning system (figures 6 and 14; column 12, lines 40-53; column/line 16/62-17/8; column 24/24-25/19; column/line 27/30-30/29)

- negotiating one or more terms of the proposal while disconnected from the private environment (column/line 15/45-16/63; column 19, lines 54-60; column/line 22/39-23/19)
- managing in said public environment comprising maintaining (or storing), obtaining status related to information and a report related to the information (figures 2, 6 and 20; column 12, lines 8-21 and 40-53; column/line 16/62-17/8; column 17, lines 25-47; column/line 22/39-23/19; column 27/20-28/18)
- registering (in real-time) the information with the private environment (figures 2, 5 and 6; column 12, lines 8-21 and 40-53)
- requesting approval of the information wherein registering is in response to the approval (figures 5 and 6; column/lines 16/62-17/8; column 17, lines 25-47; column/line 23/65-25/35; column 27/20-28/18)
- registering a proposal to form a contract and administering a contract (abstract; column 8, lines 27-56)
- a public environment comprising a web server executing a portal (figures 1 and 2; column 14, lines 8-30)

Walker et al. also teach:

- obtaining proposal data from a private environment, creating the proposal in a public environment and providing said proposal to said private environment, approving said proposal prior to providing said proposal to the private environment, registering the proposal with a private electronic environment, wherein the approved proposal becomes a [sales] contract, negotiating one or more terms of the proposal (abstract; column/line 22/39-23/19; column/line 23/65-25/35; column 26, lines 47-56)
- public environment comprises a web server (figures 1 and 2; column 14, lines 8-30)

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 24, 49 and 75 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al., U.S. Patent No. 5,794,207.

As per claim 24, 49 and 75, Walker et al. teach a system for managing information utilizing a distributed processing architecture (figures 1, 2 and 20;

column 12, lines 8-20 and 35-53; column 14, lines 30-40; column/line 27/20-28/18). Walker et al. do not explicitly recite firewalls, however, firewalls are well known systems used for protecting a network from an external threat. Therefore, it would have been obvious to one of ordinary skill to utilize a firewall to protect a computing environment from unauthorized accesses to private data (user identity data, credit card data, transaction data... etc.)

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
